

Vol.43, Issue 2, 2009

A. Baums

The „Mini-Max” method for energy consumption optimization in embedded real-time systems, pp.5-14.

P.N. Bibilo and D.A. Gorodecky

Computer-added logic circuits synthesis in modular arithmetic: can inventor be substituted by CAD, pp.15-27.

G.A. Mamedov, G.A. Rustamov and Z.R. Gasanov

Elimination of infringement sliding mode at the compelled movement controlled objects, pp.28-36.

I.P. Kobyak

Theory for in-circuit observation of VLSI using an autocorrelation function, pp.37-46.

M. Kulikovs and E. Petersons

Estimation of the simulation model parameters of system of access to a network of self-similar input streams, pp.47-56.

A.Z. Melikov and A.M. Velibekov

Computational procedures for analysis of two channels assignment schemes in wireless communication networks, pp.57-68.

V.I. Popov

Mathematical model of radio wave propagation in weak-forests (Ritov's approximates), pp.69-75.

E. Beinens and K.Kruminsh

Simulation and calculation of an asymmetrical balanced tunnel diode comparator, pp.76-80.
