

G.A. Mamedov, G.A. Rustamov and R.G. Rustamov.

Design of logic control on the basis of optimization of Lyapunov function at incomplete model of object, pp.5-11.

A.K. Kirshners, S.V. Parshutin and A.N. Borisov.

Combining clustering and decision tree classifier approaches for forecasting task, pp.12-23.

S.V. Sharkovsky and E.A. Grab.

Synthesis of high selective filters with minimal Q-factor of poles, pp.24-31.

J.J. Medel Juárez, J.C. García Infante and J.C. Sánchez García.

Fuzzy neural net digital filtering: A MIMO structure, pp.32-44.

A.M. Abbasov and I.M. Aliyev.

Mathematical model for a choice of optimal structure of MPLS-networks, pp.45-51.

V. Boicov and M. Zhivitere.

Research of the broken stochastic networks of queueing with heterogeneous requests, pp.52-58.

A.Aboltins and D. Klavins.

Synchronization for OFDM-based communication system: A brief overview, pp.59-71.

V.P. Suprun and D.A. Gorodecky.

Synthesis of n -operand adder for module of Three, pp.72-80.
