

N.M. Ivanov

The comparative analysis of methods of amplitude-phase distribution estimation for weak signals with extended spectrum, pp.5-14.

M. Greitans, V.N. Aristov, E. Hermanis

Pulse former with picosecond front on impact avalanche transit-time diode, pp.15-23.

V. Karklinsh and K. Kruminsh

Adaptive methods in the discrete stroboscopic signal conversion, pp.24-32.

Yu.E. Letunovich

Heterogeneous queuing networks with restriction of residence time in modes of service, pp.33- 41.

N.K. Kasumov

Universal method of coding in the algorithm of the data compression, pp.42-52.

Sh.A. Zargarov and F.Sh. Zargarov

Research of transmission information between symbol and packet terminals, pp.53-58.

V.P. Suprun and D.A. Gorodecky

Realizing of addition and multiplying in unitary codes, pp.59-71.

P.N. Bibilo and P.V. Liavonchyk

Experimental research of the influence of BDD optimization procedure on energy consumption of combinational CMOS circuits, pp.72-78.
