

A.V. Zelenkov

Calculation of the parameters of hidden markov models used land vehicle navigation systems for the map-matching: Overview, pp.5-24.

V.A. Smagin, A.N. Novikoff and S.U. Smagin

On one probabilistic model of the control in technical systems, pp.25-32.

M. Greitans, V.N. Aristov and E. Hermanis

Research of formers of ultra-wideband (UWB) impulses) , pp.33-42.

A.S. Rybakov and V.Yu. Vedin

Precision event timing based on digital processing of the response of a harmonic oscillator, pp.43-56.

V. Karklinsh

Optimization algorithms for balancing the discrete stroboscopic transformation, pp.57-67.

A. Baums

Mini-Max method broadening for energy consumption minimization in real-time embedded system, pp.68-74.

B.G. Ibrahimov and Sh.M. Mammadov.

Research and estimation of characteristics of terminal equipment of a link of multiservice communication networks, pp.75-80.
