

K.R. Aida-zade and A.B. Rahimov.

Numerical solving of control problem for object with uncertain information on its initial state and parameters, pp.5-15.

A.A. Lorencs.

Multivariate observation design implying non-singularity of regression model information matrix, pp.16-26.

V.A. Smagin and S.Yu. Smagin.

The approached definition of function of entropy distribution, pp.27-37.

V.A. Nikolsky.

Problem of invariance for digital systems of stabilization, functioning in the conditions of regular chaos, pp.38-50.

R.A. Nasibova and E.N. Nasibov.

On a linearity of the ordered weighted aggregation, pp.51-61.

M.A. Gladshstein.

Reducing of delay of distribution of a signal of the combinative summator of decimal digits in Johnson-Moebius's code, pp.62-71.

M.A. Schnepf-Schneppe.

Smart House and conception ITU G.hn, pp.72-82.
