June 11, 2020, No 1.6.-3.-40

To whom it may concern,

From September 1st 2019 to August 31st 2021 DATI Group, Ltd. (DATI Group), the Institute of Mathematics and Computer Science of the University of Latvia (LUMII) and the Institute of Electronics and Computer Science (EDI) worked together to implement the European Regional Development Fund project 1.1.1. "Specific Aid Objective To increase the research and innovative capacity of scientific institutions of Latvia and the ability to attract external financing, investing in human resources and infrastructure" activity 1.1.1.1. "Practical research projects" in the project "Multidimensional Aerial and Facility Scanning System (MAFSS)".

DATI Group, as an industrial partner, led practical research to gain insight about mobile sensor data gathering of inaccessible, closed facilities in areas with poor network coverage. As a part of the project, EDI executed research regarding optimal radar sensor usage for closed facility surveillance and change detection, as well as developed radar sensor modules, which can be operated using a mobile platform. LUMII researched and developed a solution for optimal data transmission in poor coverage areas. DATI Group implemented the insights to develop a prototype, which integrates the developed radars, data transmission solutions, and cloud data storage.

Thus, DATI Group can assure the high level of technologic knowledge and capabilities to develop electronic sensors of EDI. In their work, EDI displays high attention to detail. DATI Group recommends EDI for custom hardware and software product development, prototyping, and testing, especially in the fields of wireless sensors and the internet of things. EDI has been highly responsive to the requests and concerns of DATI Group throughout the project. The DATI Group team appreciates the collaboration and wishes to strengthen the relationship with EDI by collaborating in EU projects in the future.

In case of any further questions, feel free to contact DATI Group.

Sincerely,

Māris Golubovskis

Chairman of the board, DATI Group Ltd.
