Appendices N.a.
Date 13 May 2020

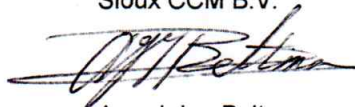

Sioux Technologies and Elektronikas un datorzinatnu instituts (EDI) have been working very closely together to implement H2020 ECSEL project "Intelligent Motion Control Platform for Smart Mechatronic Systems" (I-MECH) for the last 3 years. We as a I-MECH project coordinator worked together with EDI as a I-MECH project Work Package and Building Block (Real-time wireless sensors) leader on various topics to make the project a success (which we did). From our experience of cooperation, we can assure that EDI is reliable, competent, punctual, professional and capable partner always willing to go one step further to go beyond the expected and reach the best result. Their proactivity and willingness to always help has greatly benefited us and project in general. It is always easy to work with them as they have great communication skills and high sense of responsibility for deadlines. Therefore, we are very confident to recommend EDI as a valuable project partner not only for implementation of different EU projects, but also for technical/scientific developments (HW and SW), as they have shown impressive knowledge in different scientific areas, such as wireless systems, robotics, artificial intelligence, and other.

Sioux Technologies wants to contribute to a safe, healthy and sustainable world through technological innovation. We aim for growth for our employees, our company and our customers. Sioux creates success and adds value by learning, sharing, interacting, having fun and working on innovative solutions based on transparency and trust. We believe in flexible and learning organizations, long-term relationships and the strength of cooperation within a system of open innovation with clients and co-developers. During the course of I-MECH we experienced that EDI fitted very well in this philosophy.

If you have any further questions, please feel free to contact Sioux Technologies.

With kind regards,

Sioux CCM B.V.

Arend-Jan Beltman
Manager Mechatronics / Program manager technology / Coordinator I-MECH
