

Egļu mizgraužu bojājumu detektēšanas rezultāti no Sentinel-2 datiem

Spruce bark beetle damage detection by Sentinel-2 data

1. Reference from UAV data

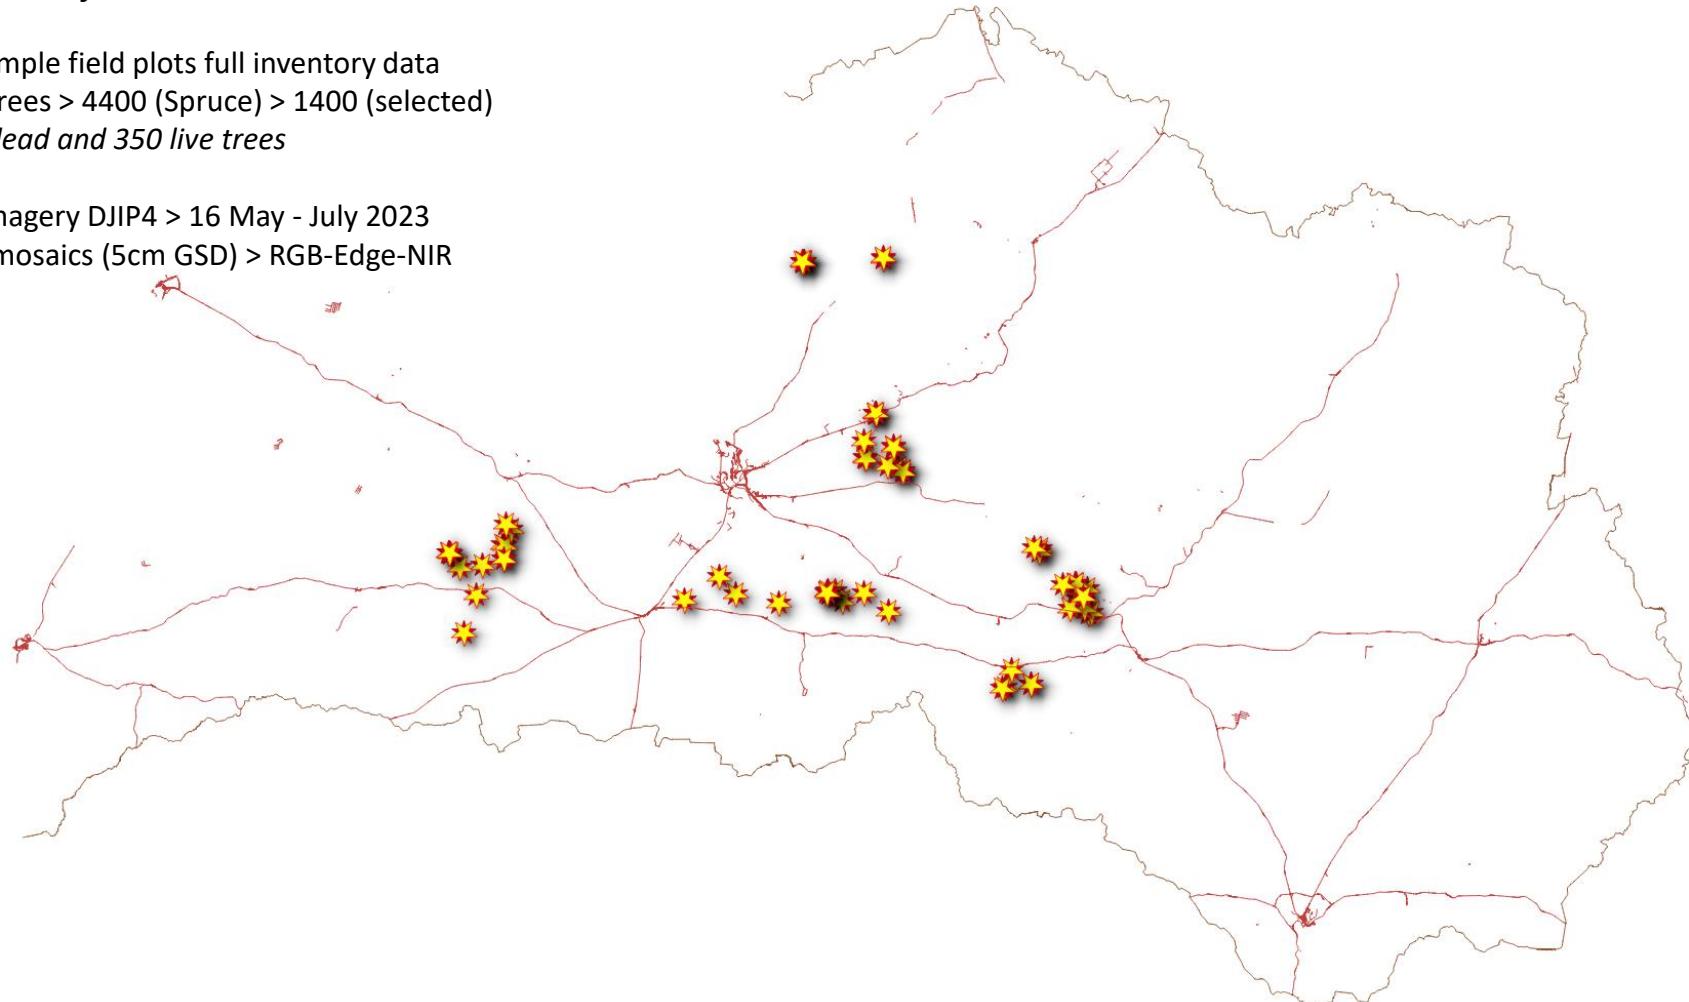

52 sample field plots full inventory data

5000 trees > 4400 (Spruce) > 1400 (selected)

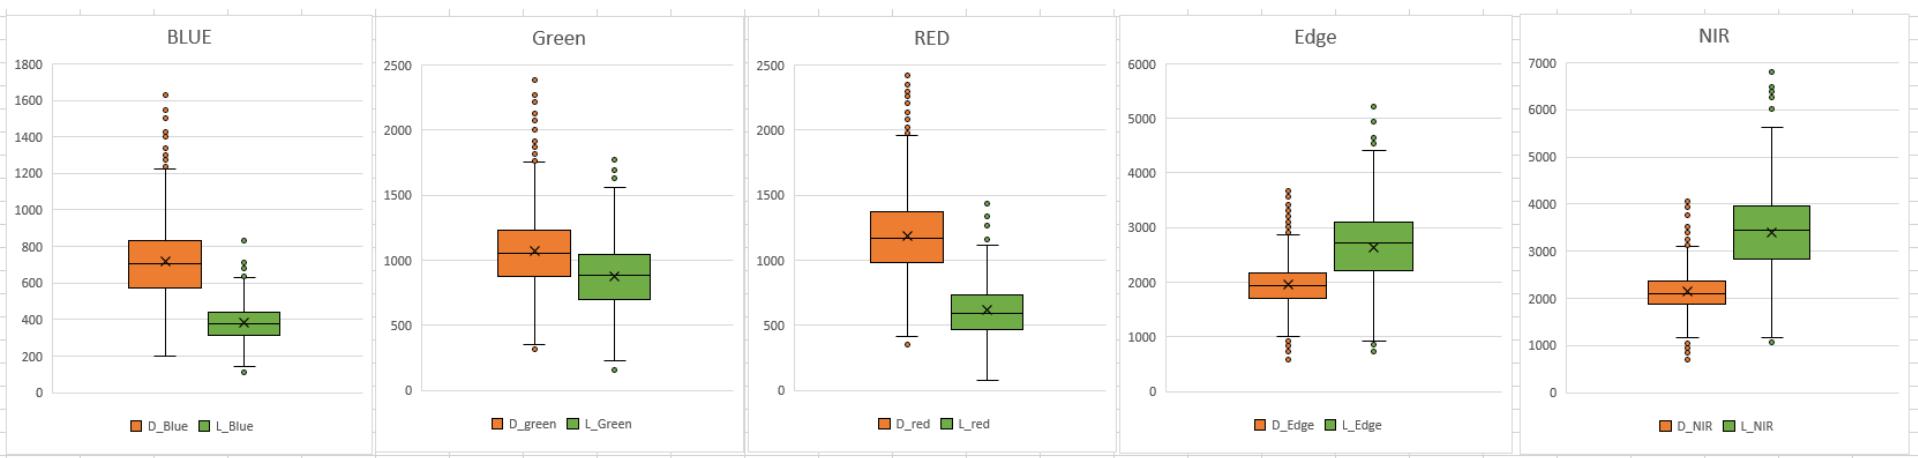

1000 dead and 350 live trees

UAV imagery DJIP4 > 16 May - July 2023

Orthomosaics (5cm GSD) > RGB-Edge-NIR

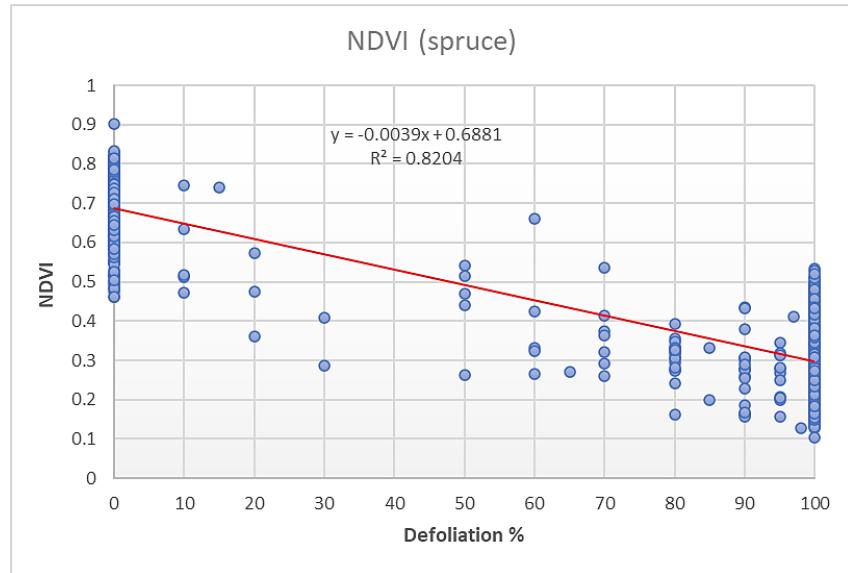

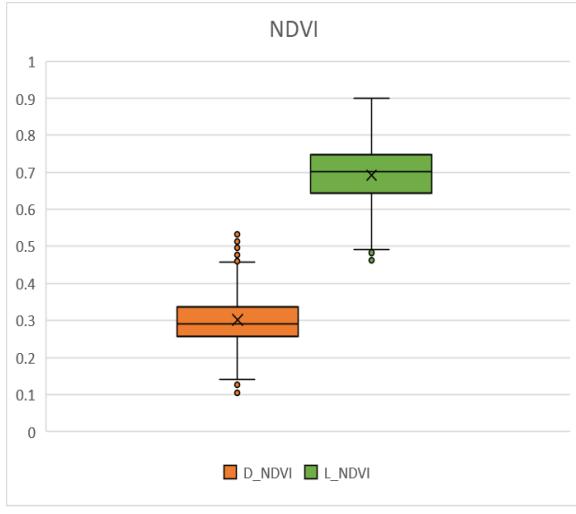

2. UAV-imagery spectral Vegetation Index (VI) thresholding

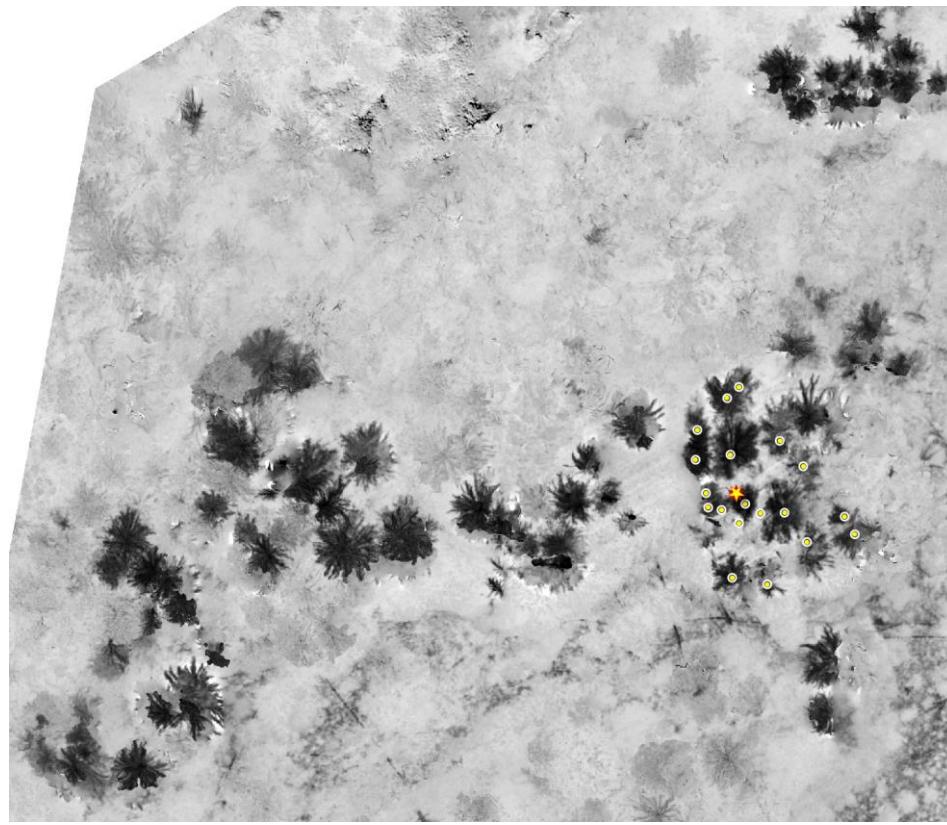

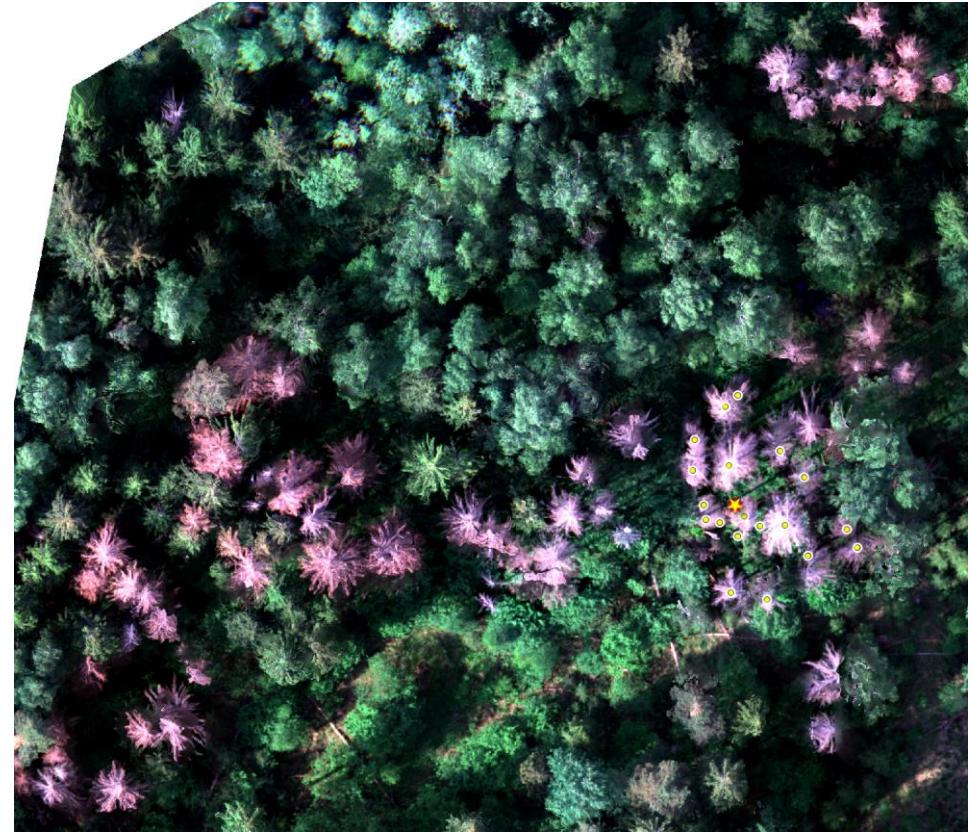

62 sample field plots across Latvia
1000 dead (90-100% defoliation)
350 live (0-10% defoliation) spruce trees

2. UAV-imagery spectral Vegetation Index (VI) thresholding

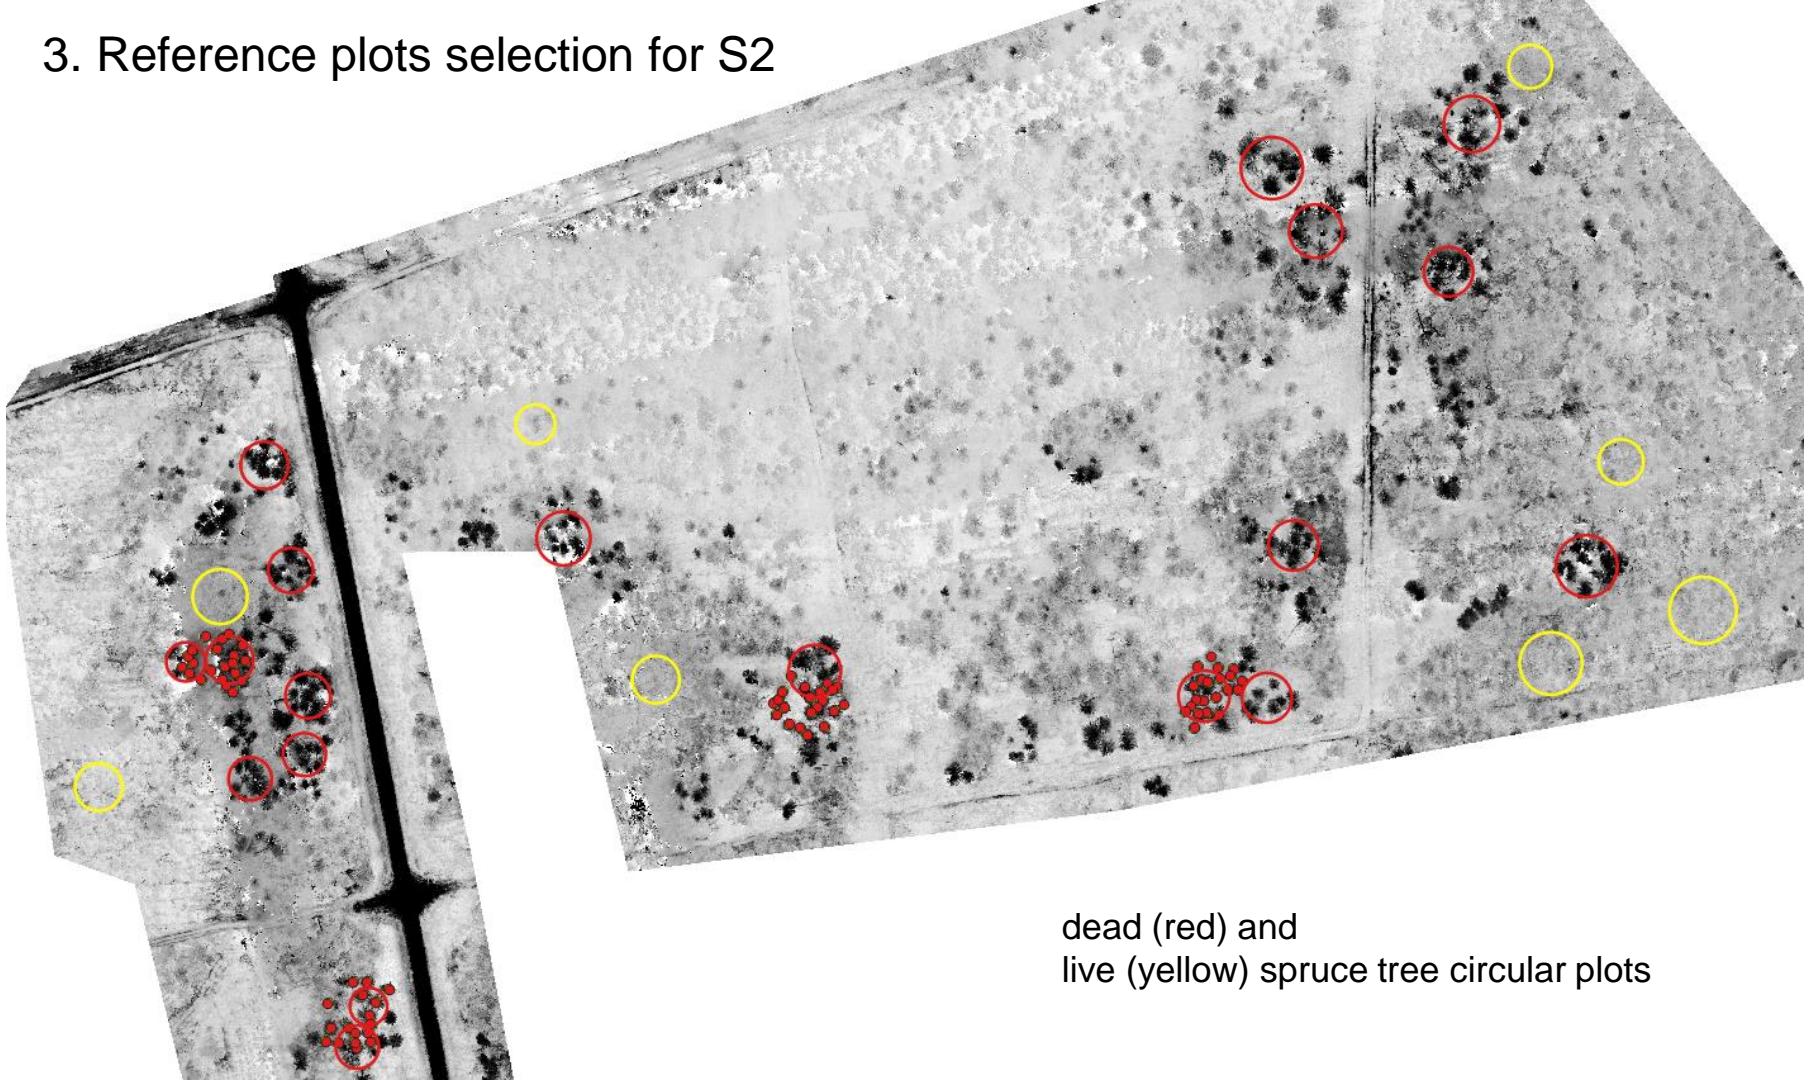

(*NDVI, GNDVI, BNDVI, RB-NDVI, RVI, NGRDI, VARI, EVI...*)

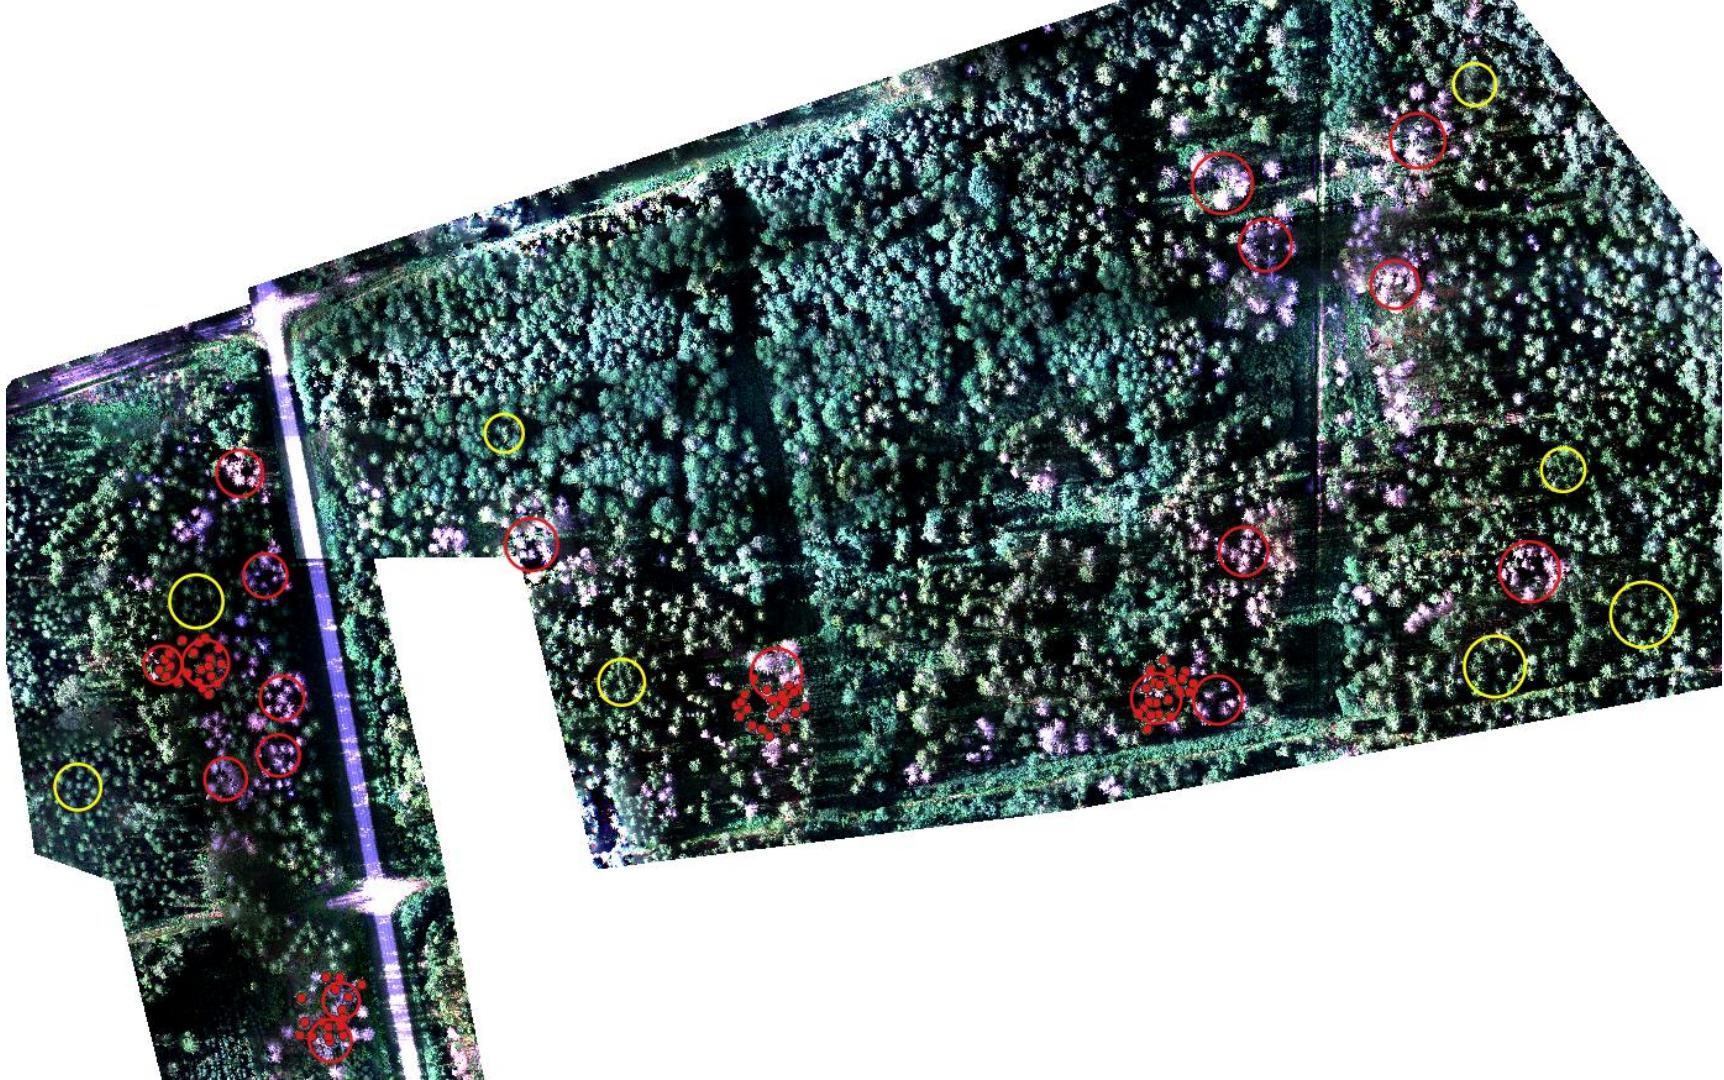

52 sample field plots across Latvia
1000 dead (90-100% defoliation)
350 live (90-100% defoliation) spruce trees

3. Reference plots selection for S2

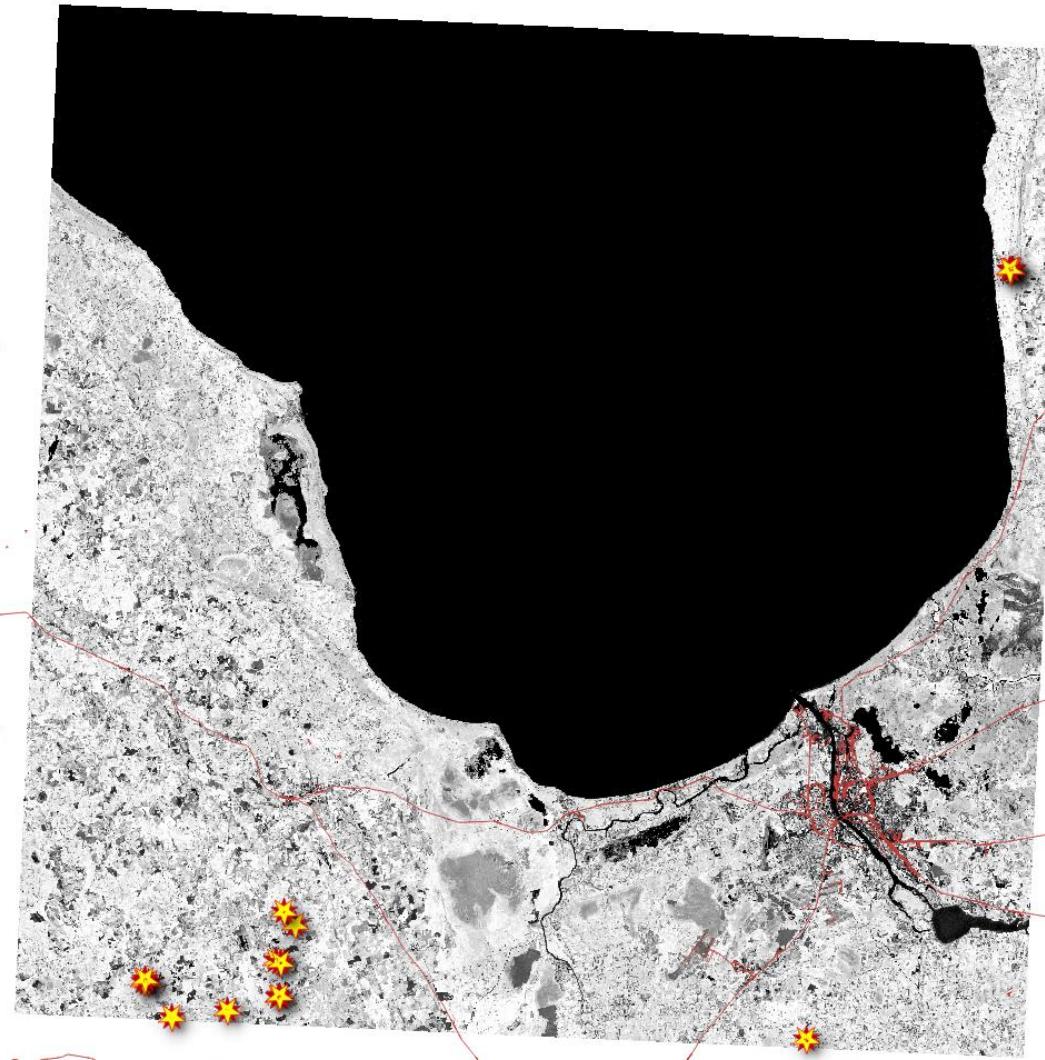

dead (red) and
live (yellow) spruce tree circular plots

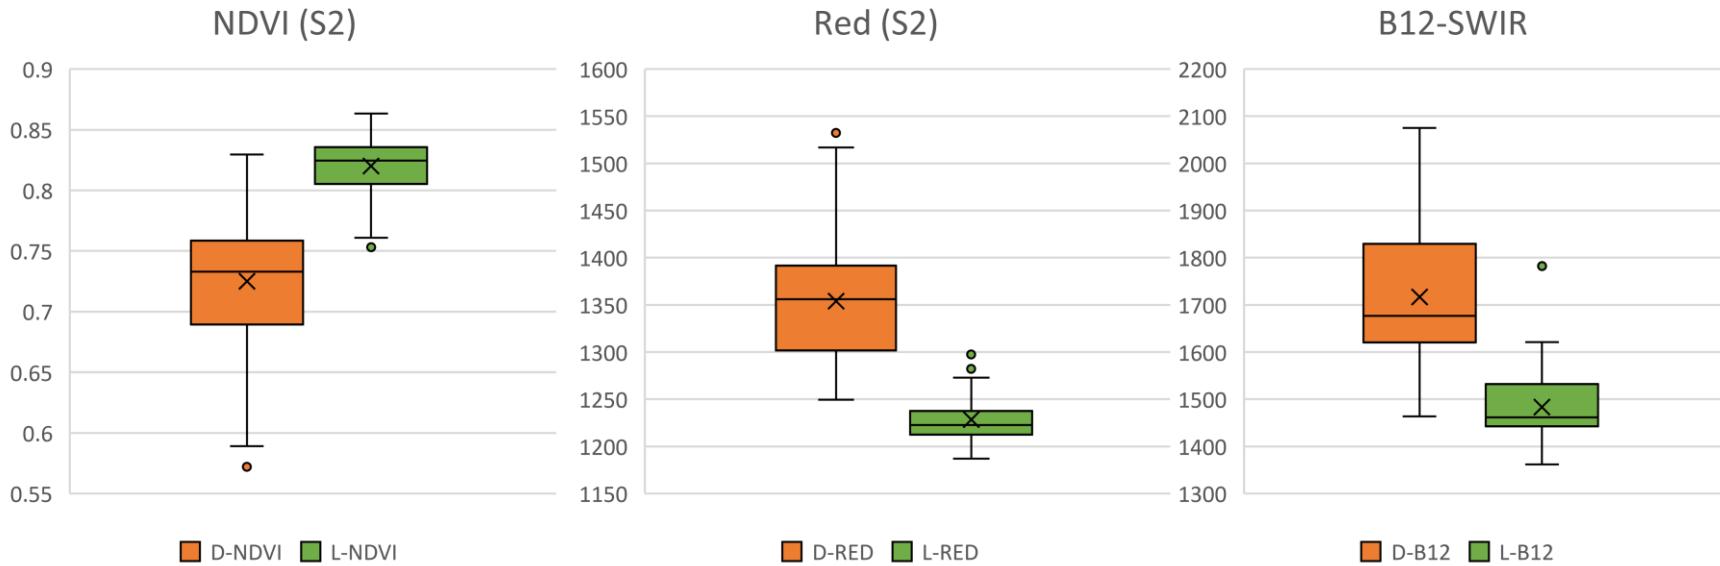

Reference plots selection for T34VFJ
08-June-23 S2-2A:

69 dead (red) and
60 live (yellow) spruce tree circular plots

4. Sentinel-2 spectral bands and VI thresholding

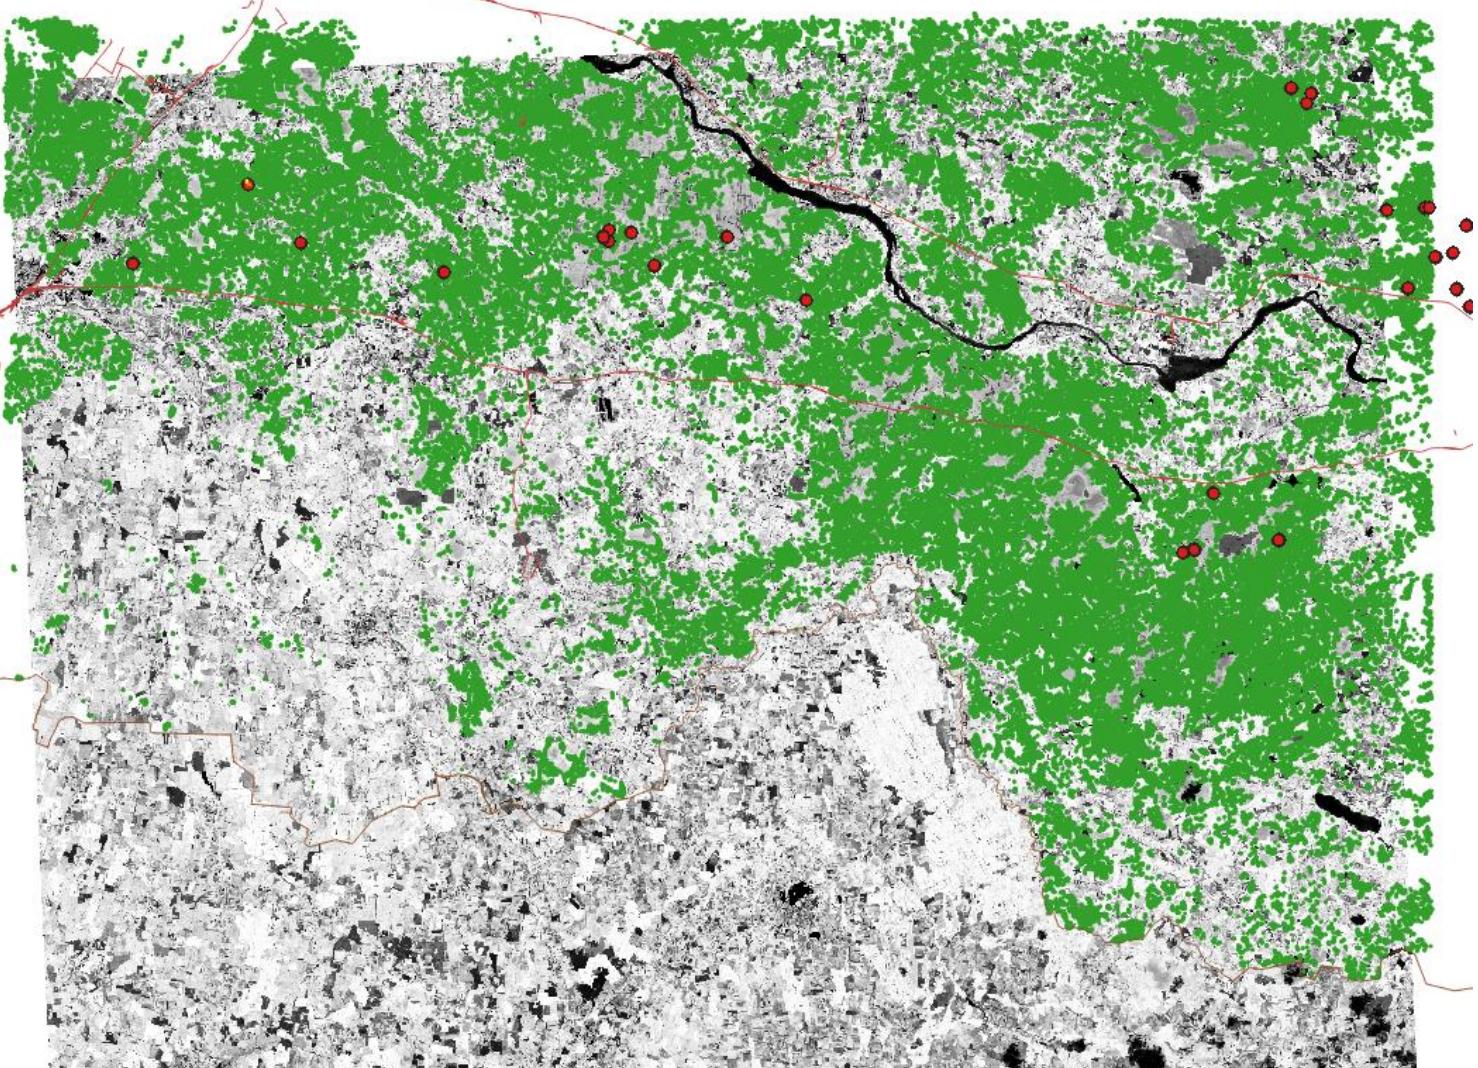

T34VFJ 08-June-23
69 dead (red) and
60 live (yellow) spruce tree circular plots

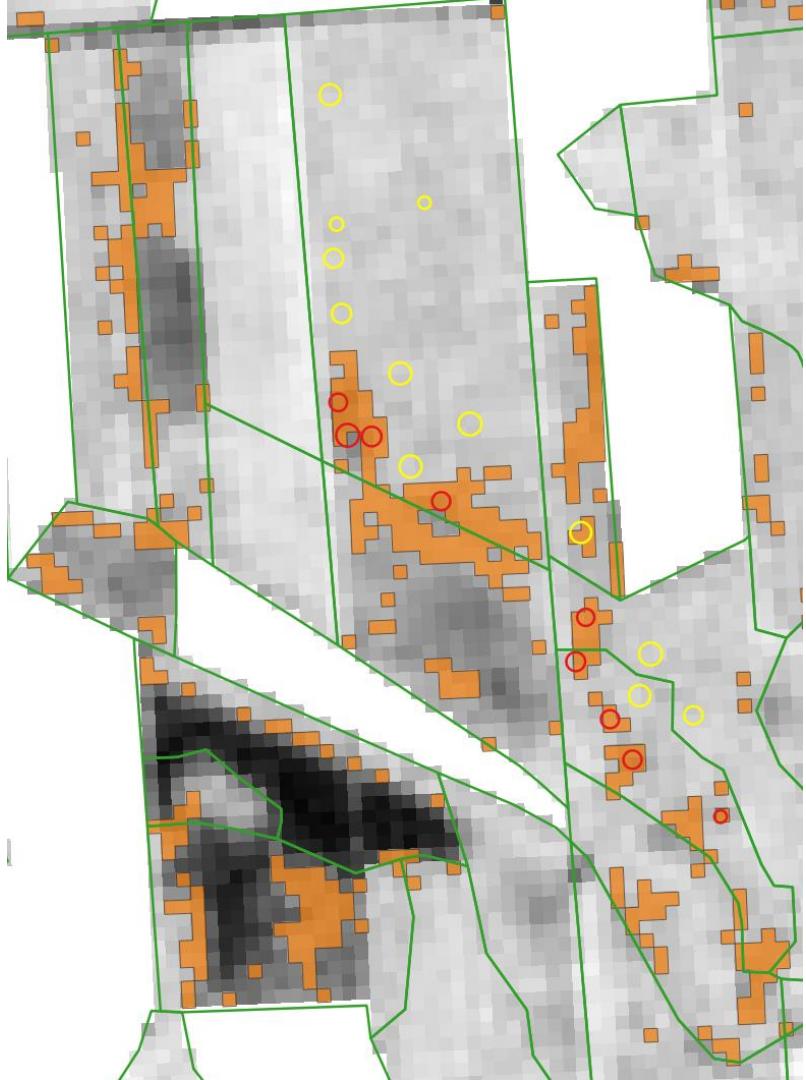

NDVI accuracy check:
08-Jun-23 T35VLC

Red dots – check
UAV-NDVI-based
60 dead and
64 live spruce tree
circular plots

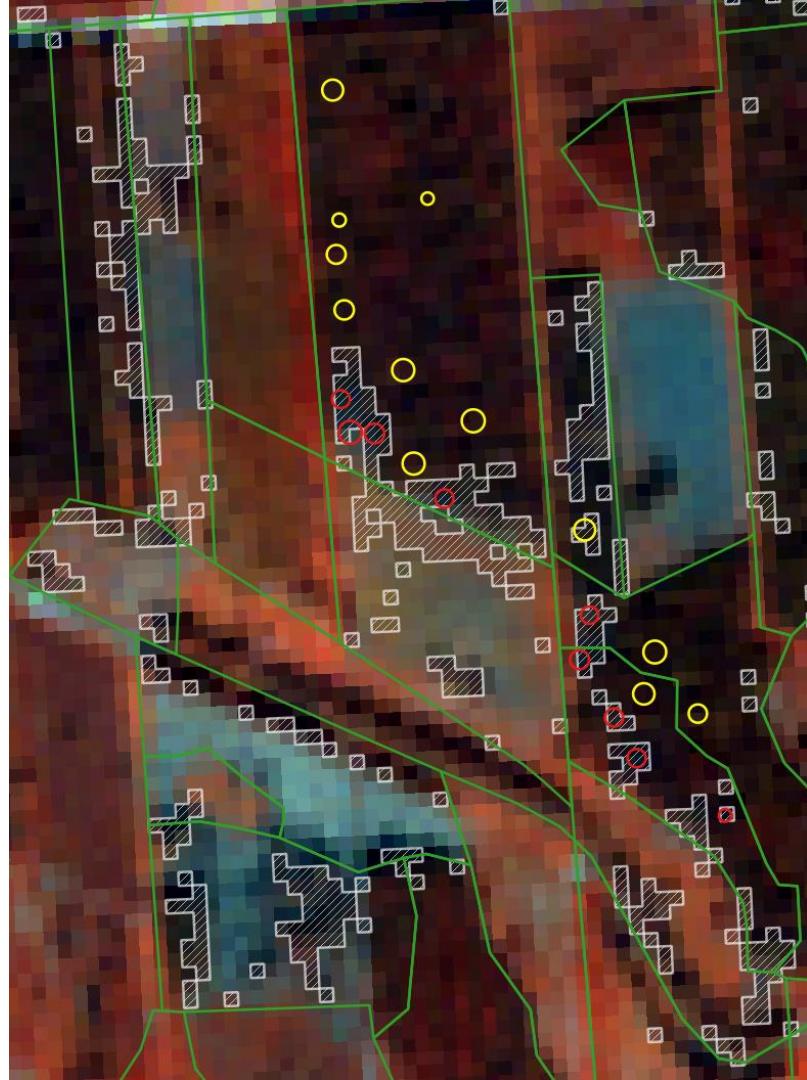

Green polygons >
Spruce (>20%)
1st floor forests

NDVI

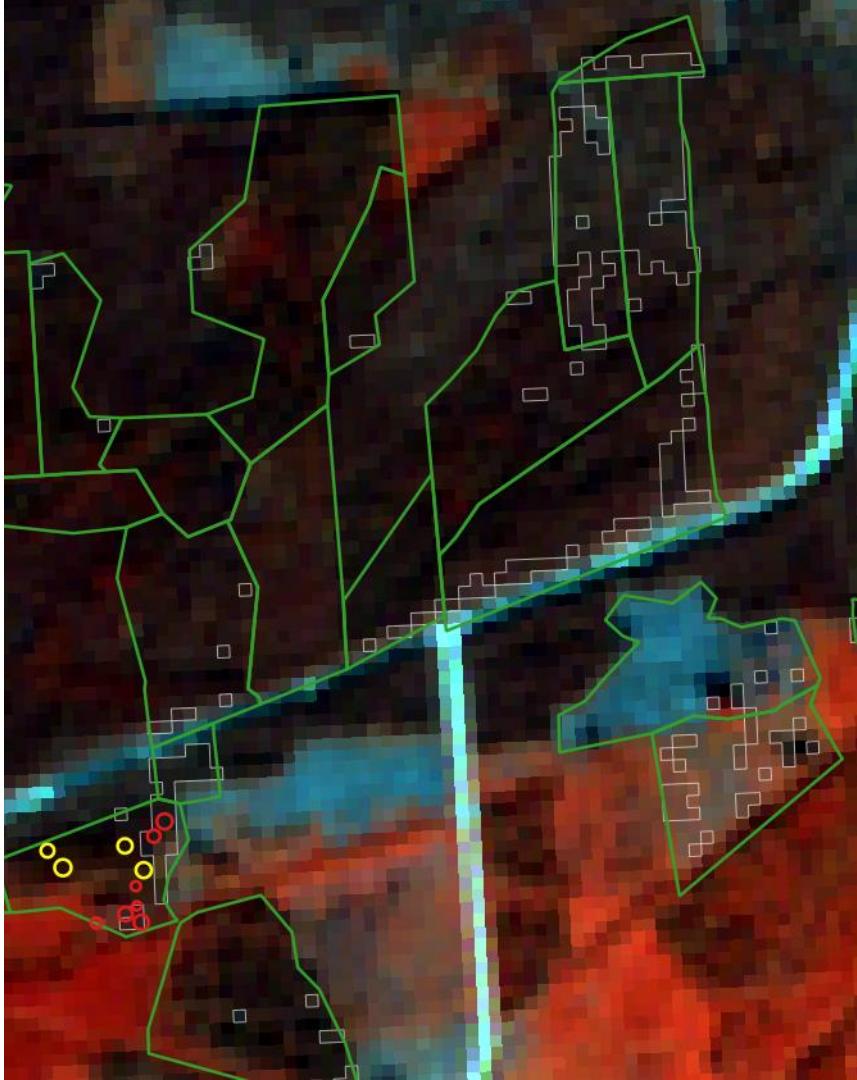

Infra
Red

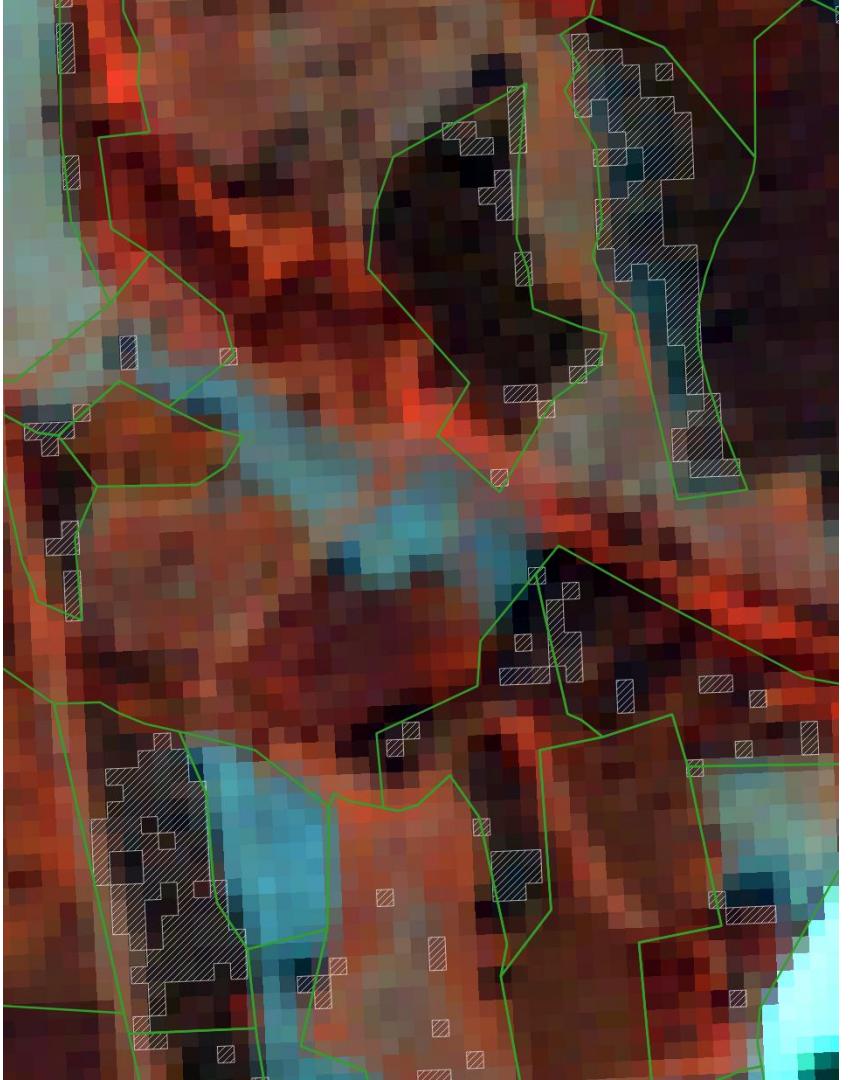

NDVI accuracy check: 08-Jun-23 T35VLC

		Dead	Live
Dead	60	52	8
Live	64	7	57
		TP	FN
		FP	TN

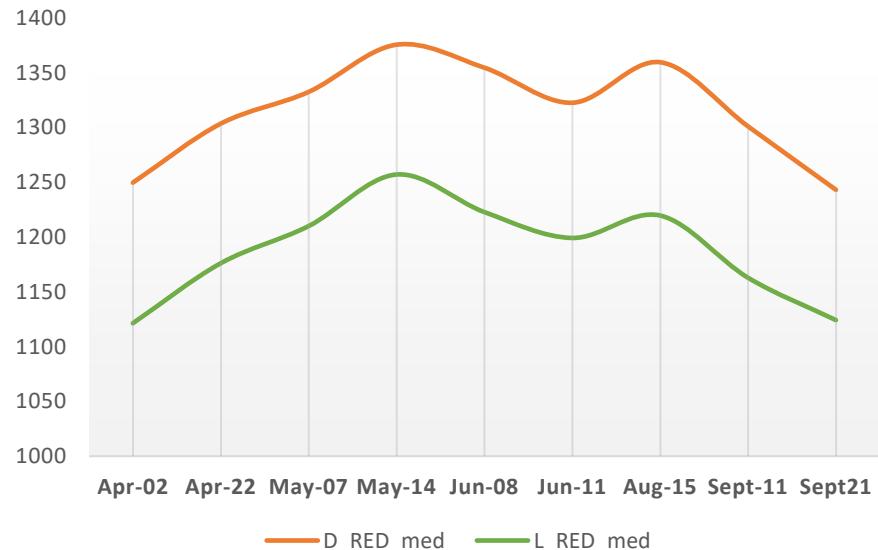

Accuracy (ACC)	0.88
Precision (PPV)	0.88
Recall (TPR)	0.87
F1	0.87

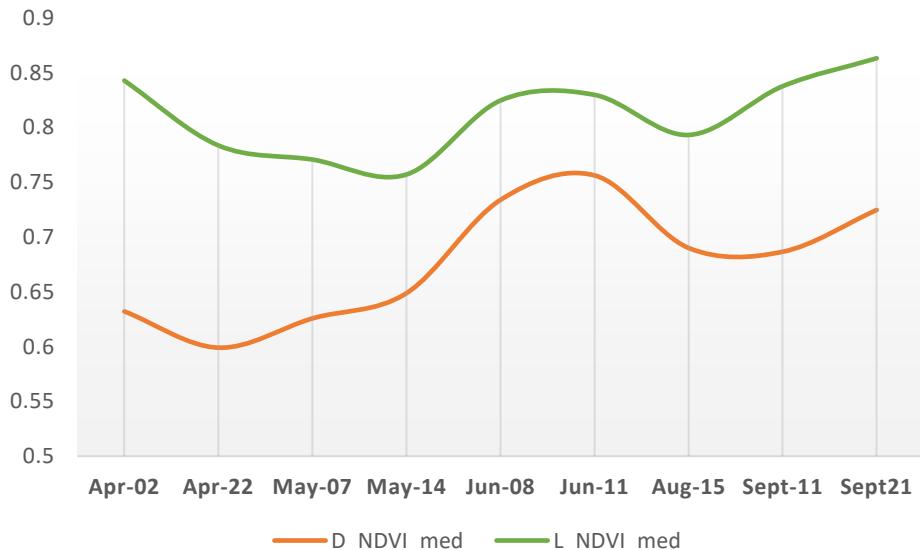

Changes along the 2023 season

Dead-Live spruce S2-RED separation 2023

Dead-Live spruce S2-NDVI separation 2023

Conclusions

LIMITATIONS:

1. Dead Spruce (grey-attack) detection only (?!)
2. Problems with False Positives
3. Correct clear-cutting and spruce forest polygons (masks)
4. Clarifying and updating the Spectral Vegetation Indexes (VI) thresholds along the season
5. What is the dead spruce minimal spatial area extend for S2 success?

POSITIVE:

1. NDVI best spectral VI for thresholding (UAV and Sentinel-2 imagery) with accuracy > 80%
2. Spectral VI-es (NDVI) as a source for machine learning classifiers

Paldies par uzmanību!
