No. 3.1/2-46-2023

***Regarding cooperation on the project “Intelligent transport and emergency management platform (iTrEMP)”***

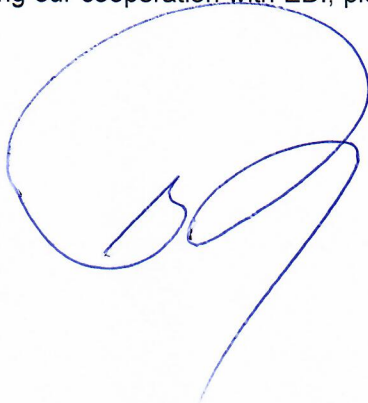

Between April 1st, 2019, and September 30th, 2020, **WeAreDots, SIA** (reg. No. 40103853272, legal address Kronvalda bulvaris 3 – 5, Rīga, LV-1010, Latvia) (hereinafter – **dots.**) collaborated with the Institute of Electronics and Computer Science (name in Latvian – Elektronikas un datorzinātņu institūts) (hereinafter – EDI) on the project **“Intelligent transport and emergency management platform (iTrEMP)”** to develop an innovative platform for traffic data acquisition, distribution and management which could serve as a basis for new products supporting greener and more efficient development and management of cities.

During our collaboration, EDI proved itself as a capable partner, and as a result, we not only achieved the goals set out in the project, but **dots.** also purchased the rights to the part of intellectual property developed in this project by EDI. We can confidently recommend EDI as a valuable partner for research and development of different AI, smart city and WSN based systems.

For any further questions regarding our cooperation with EDI, please feel free to contact us via e-mail at [info@wearedots.com](mailto:info@wearedots.com).

Sincerely,

WeAreDots, SIA  
Member of the Board

Juris Vilders
